

WOW!

30 minute flight in an aerobatic aircraft with the chance to take control yourself.

Welcome to the world of aerobatics, cloud dancing and manoeuvres in the sky that will leave you wanting more.

Of course, if you wish you can have a scenic flight to view the spectacular countryside and coastline of Cornwall.

The Aircraft

Our Super Decathlon is a fully rated aerobatic aircraft capable of pulling -5G to +6G with a fully inverted fuel system which enables the world to be seen upside down. The other amazing manoeuvres available for you to experience are stall turns, loops, rolls and chandelles. The instructor will demonstrate these to you and also give you the opportunity of taking the controls yourself. You will be sitting in the aircraft previously owned and flown by Top Gear's James May.

What to expect on the day

On arrival you will have a pre-flight safety briefing from your instructor.

You will be shown the aircraft and fitted into the harness.

The flight will last 30 minutes from brakes off to brakes on.

Once airborne if you wish you will be able to take the controls under the guidance of your pilot Captain Andy Wilkins.

An action video of your flight can be requested prior to booking.
